

Biosenta Inc and New South Biolabs LLC Under Partnership Agreement

TORONTO, March 26, 2013 Biosenta, Inc. (CNSX: ZRO) (the "Company") and New South Biolabs LLC. USA are pleased to announce a non-exclusive partnership to market and distribute the family of Zeromold products in the Southern USA, Caribbean Basin and South America. In addition to the non-exclusive distribution agreement, New South Biolabs will be responsible for the enterprise resource planning [ERP], production and customer relations management [CRM] within this territory.

New South Biolabs will pay a \$600,000 mobilization fee to Biosenta. \$300,000 has been received upon execution of the agreement. The second payment of \$300,000 is due when Biosenta receives confirmation of the EPA and Florida State Zeromold product registration. New South Biolabs Inc. has also agreed to share profits from their in-house account distribution of Zeromold products. Biosenta will receive 30% of net profits from Zeromold product distribution after New South has recovered its fixed costs for the setup of ERP, production and CRM components. Biosenta will continue to make its profit margin on the sale of all Zeromold products sold in the territory.

"This synergistic partnership has quickly borne fruit. The combined teams have already begun to execute as expected and deliver the logistics support and develop the marketing program for this territory" said Bruce Lewis, President and Chief Executive Officer of Biosenta. He added, "New South Biolabs is a unique partnership opportunity that will enable our Company to penetrate the USA market rapidly with Zeromold products in a geographic area that suffers heavily from black mould infestation."

About BIOSENTA Inc.

BIOSENTA Inc.'s line of retail anti-microbial products will effectively kill mould, bacteria and fungi on contact and prevent re-growth. These products address the demand created by the mounting health and environmental concerns. Mould can affect the immune system, nervous system, liver, kidneys, blood and cause brain damage.

BIOSENTA will also manufacture and distribute an anti-microbial filler. Calcium Carbonate is one of the most common fillers used industrially. It is susceptible like other fillers that hold moisture to attracting mould. Annual global revenue in the calcium carbonate filler industry approximates 140 billion dollars. BIOSENTA will produce anti-microbial filler that performs 'filling' and 'bulking' functions like calcium carbonate. BIOSENTA's filler product will not attract moisture and consequently mould infestation. BIOSENTA's filler with its anti-microbial high pH core in individual particles will enhance commercial product life and eradicate a broad spectrum of known bacteria, fungi, algae and other micro-organisms by suppression of their reproduction.

Forward-Looking Information

This release may contain forward-looking statements information and statements which constitute "forward-looking information" under Canadian securities law and which may be

material regarding, among other things, the Company's beliefs, plans, objectives, estimates, intentions and expectations with respect to its capital and funding plans. Inherent in the forward-looking information and statements are known and unknown risks, uncertainties and other factors beyond the Company's ability to control or predict, which give rise to the possibility that the Company's predictions, forecasts, expectations or conclusions will not prove to be accurate, that its assumptions may not be correct and that the Company's plans, objectives and statements will not be achieved. Actual results or developments may differ materially from those contemplated by the forward-looking information and statements. Consequently, undue reliance should not be placed on such forward-looking statements.

On behalf of the Board of Directors of BIOSENTA Inc.

Bruce Lewis
Chairman
