

PRESS RELEASE

Biosenta today announced it is in discussions with Polski Bazalt/ STM Technology (“STM”), a company that produces basalt composite pallets, to implement a licensing agreement for Tri-Filler and to sell to STM a 1 tonne per hour plant to manufacture Tri-Filler.

The agreement is expected to be finalized in the next few months. Biosenta will give a license to STM to manufacture and use Tri-Filler in its Poland-based operation that will supply pallets to the European Union.

The founder and Chairman of STM, Stanley Rokicki, said that Tri-Filler will provide anti-microbial protection for the pallets and make them more suitable for applications related to food and medicine. He added that Tri-Filler also enhances the structural strength and fire retardant properties of the pallets as compared to fillers currently employed.

The CEO and Chairman of Biosenta, Dene Rogers, said that the two companies have been collaborating for approximately two years while the testing and development of Tri-Filler has been finalized.
